

Sandra Seidel
SENCER Leadership Fellow

Biosketch

Sandra Seidel returned to the University of Virginia as an Assistant Dean and Associate Professor of Biology in 2005. She first became involved with SENCER while a faculty member at Elon University through her participation in SENCER Summer Institutes as an advance team representative (2003), a team leader (2004) and an alumni representative (2005). Work on Elon's multidisciplinary SENCER course led to an application and invitation to be a CASTL Scholar at the 2005 CASTL Institute in Chicago, IL.

Sandy earned a B.S. in Biology at the College of William and Mary and received an M.E. and Ph.D. in Biomedical Engineering from the University of Virginia. She enjoys teaching general and human biology courses to non-majors and has assisted in developing multidisciplinary/interdisciplinary science courses at each of the 3 academic institutions where she has held faculty appointments over the past 16 years.
